\1 Includes Bahamas, Bermuda, Cayman Islands, Netherlands Antilles, and Panama. For data beginning June 2006, also includes the British Virgin Islands.

The data on this page represent foreign investors' purchases and sales of long-term U.S. securities (that is, U.S. Treasury and Government agency bonds and notes, and U.S. corporate bonds and stocks) as reported in the Treasury International Capital (TIC) reporting system. Foreign investors have also acquired U.S. equities through mergers and reincorporations that involve stock swaps, but these acquisitions have been relatively small recently, totaling only \$4 billion in 2006 and \$11 billion in 2007. There were no reported acquisitions through stock swaps in 2008 or so far in 2009. (Stock swaps data for the most recent quarter are Federal Reserve Board/Treasury estimates and are subject to substantial revisions.) These stock swaps are not reported under the TIC reporting system, but are available on the TIC Website. The TIC Website also provides estimates from the Federal Reserve Bank of New York on principal repayment flows of foreign holdings of U.S. government agency and corporate asset-backed securities (ABS). These repayments are estimated to have reduced foreign net purchases of U.S. securities by \$160 billion in 2006, \$234 billion in 2007, \$191 billion in 2008, and \$108 billion in the first half of 2009.

In 2006, net foreign acquisitions of U.S. securities (after including stock swaps and accounting for ABS repayment flows) totaled a record of \$987 billion, but then slowed to \$782 billion in 2007. Net acquisitions slowed further to \$221 billion in 2008, as foreign investors continued to acquire U.S. securities in the first half of the year, but on net sold U.S. securities in the second half of the year. Foreign net purchases have picked up in the first half of 2009 to \$127 billion (after accounting for ABS repayments).

Chart CM-D -- Net Purchases of Long-Term Foreign Securities by U.S. Investors*

Total.....	172,391	250,907	229,223	-101,841	107,972	83,030

* Net purchases by U.S. investors equal net sales by foreigners, or gross sales minus gross purchases of securities.

The data on this page represent U.S. investors' purchases and sales of long-term foreign securities as reported to the Treasury International Capital (TIC) reporting system. U.S. investors also have acquired foreign stocks through mergers that involve stock swaps. Net acquisitions through stock swaps amounted to \$4 billion in 2005, \$19 billion in 2006, \$12 billion in 2007, \$7 billion in 2008, and \$2 billion in the first quarter of 2009. There were no acquisitions through stock swaps in the second quarter of 2009. (Stock swaps data for the most recent quarter are Federal Reserve Board/Treasury estimates and are subject to substantial revisions.) These stock swaps are not reported under the TIC reporting system, but are available on the TIC Website.

Including the stock swaps, U.S. net purchases of long-term foreign securities amounted \$176 billion in 2005 and \$270 billion in 2006, but then eased somewhat to \$241 billion in 2007. U.S. investors switched to net sales of \$95 billion in foreign securities in 2008. U.S. investors' acquisitions have recovered to \$110 billion in the first half of 2009 (after accounting for acquisitions through stock swaps).
